

**CONSPIRACY  
THEORISTS**

**L I E**

**November 22, 1963: Lee Harvey Oswald, a unhappy loner with dreams of grandeur, murdered President John F. Kennedy. There is no mystery here; this is not an unsolved crime.**

**Anyone who tells you differently is lying.**

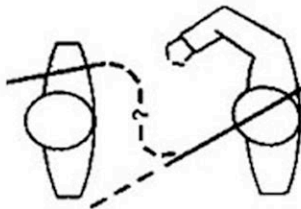

**One of the most popular lies is the idea that it would have taken a “magic bullet” to strike both President Kennedy and Governor Connally.**

**Conspiracy Theorists demonstrate this “fact” with false graphics.**

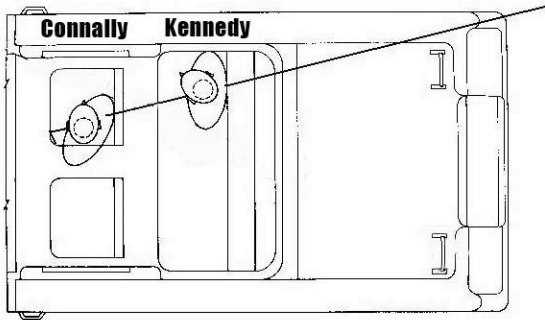

**Connally**

**Kennedy**

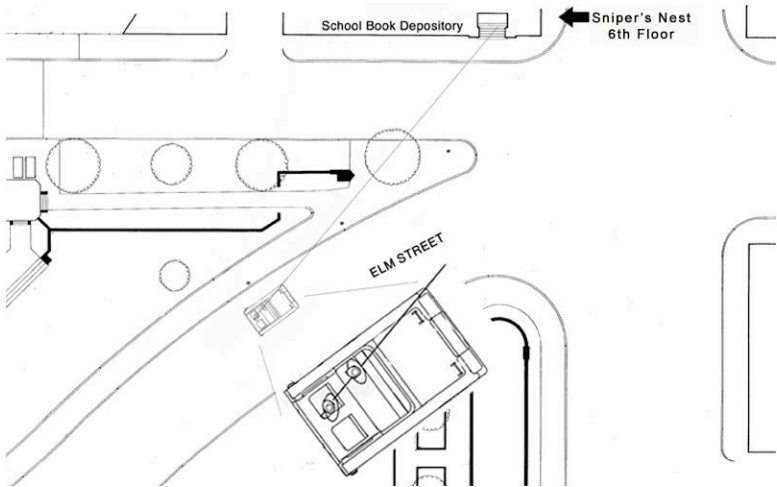

Impossible,  
right?

**In reality, Connally was not seated directly in front of Kennedy and he was not facing forward when they were hit.**

**Conspiracists also ignore the lay of the land in Dealey Plaza and the fact that Elm Street curves down and away from the Sniper's Nest. When the actual facts are put into their proper context, you can see that there is no need for a magic bullet.**

School Book Depository

Sniper's Nest  
6th Floor

ELM STREET

**Conspiracists insist that our government is lying to us, but the more you look into each of their claims, the more you find the conspiracists are dependent on lies to make their case.**

**Unfortunately, when you disprove any of their lies, most conspiracists will simply move on to another lie, and another lie, and another lie...**

**America is not a Fascist State, where secret forces can murder at will and get away with it. Do not allow the conspiracists to poison your mind and insult everything that President Kennedy believed in.**

**For a reasonable  
take on the past, and  
the lessons it has to offer us,
